

LINE ALERT™ INSERTION TOOL (Patent Pending)

The standard LINE ALERT™ Insertion Tool is engineered to provide the most effective placement of the LINE ALERT™ Panel. The Tool is made from rugged aluminum with steel alloy tension clips to ensure a secure grip on the Panel as it's inserted and properly placed into the potholed or daylighted hole. Once the hole is backfilled to the top of the LINE ALERT™ Panel, a quick tug on the Tool will disengage it from the Panel so that no damage to or movement of the Panel occurs. **THE STANDARD ALL ALUMINUM INSERTION TOOL IS APPROPRIATE FOR ENVIRONMENTS WHERE ELECTRICAL GROUNDING IS NOT A CONCERN.**

LINE ALERT™ PANELS AND INSERTION TOOLS MUST ONLY BE USED BY TRAINED AND CERTIFIED OPERATORS. ONLINE TRAINING AND CERTIFICATION IS INCLUDED IN THE PURCHASE PRICE OF THE PANEL.

SPECIFICATIONS

Size

Unassembled:	
Tool Head:	12" Wide x 33.5" High x 2" Thick 30.5cm Wide x 85cm High x 5cm Thick
Handle:	35" Long (89cm) Un-extended
Height Assembled:	6'1/2" (184.2cm) closed to 8' (244cm) extended

Weight

11 Pounds / 5 Kilograms
